

Quick Heal

# Quick Heal Internet Security

Smart | Secure | Sustainable

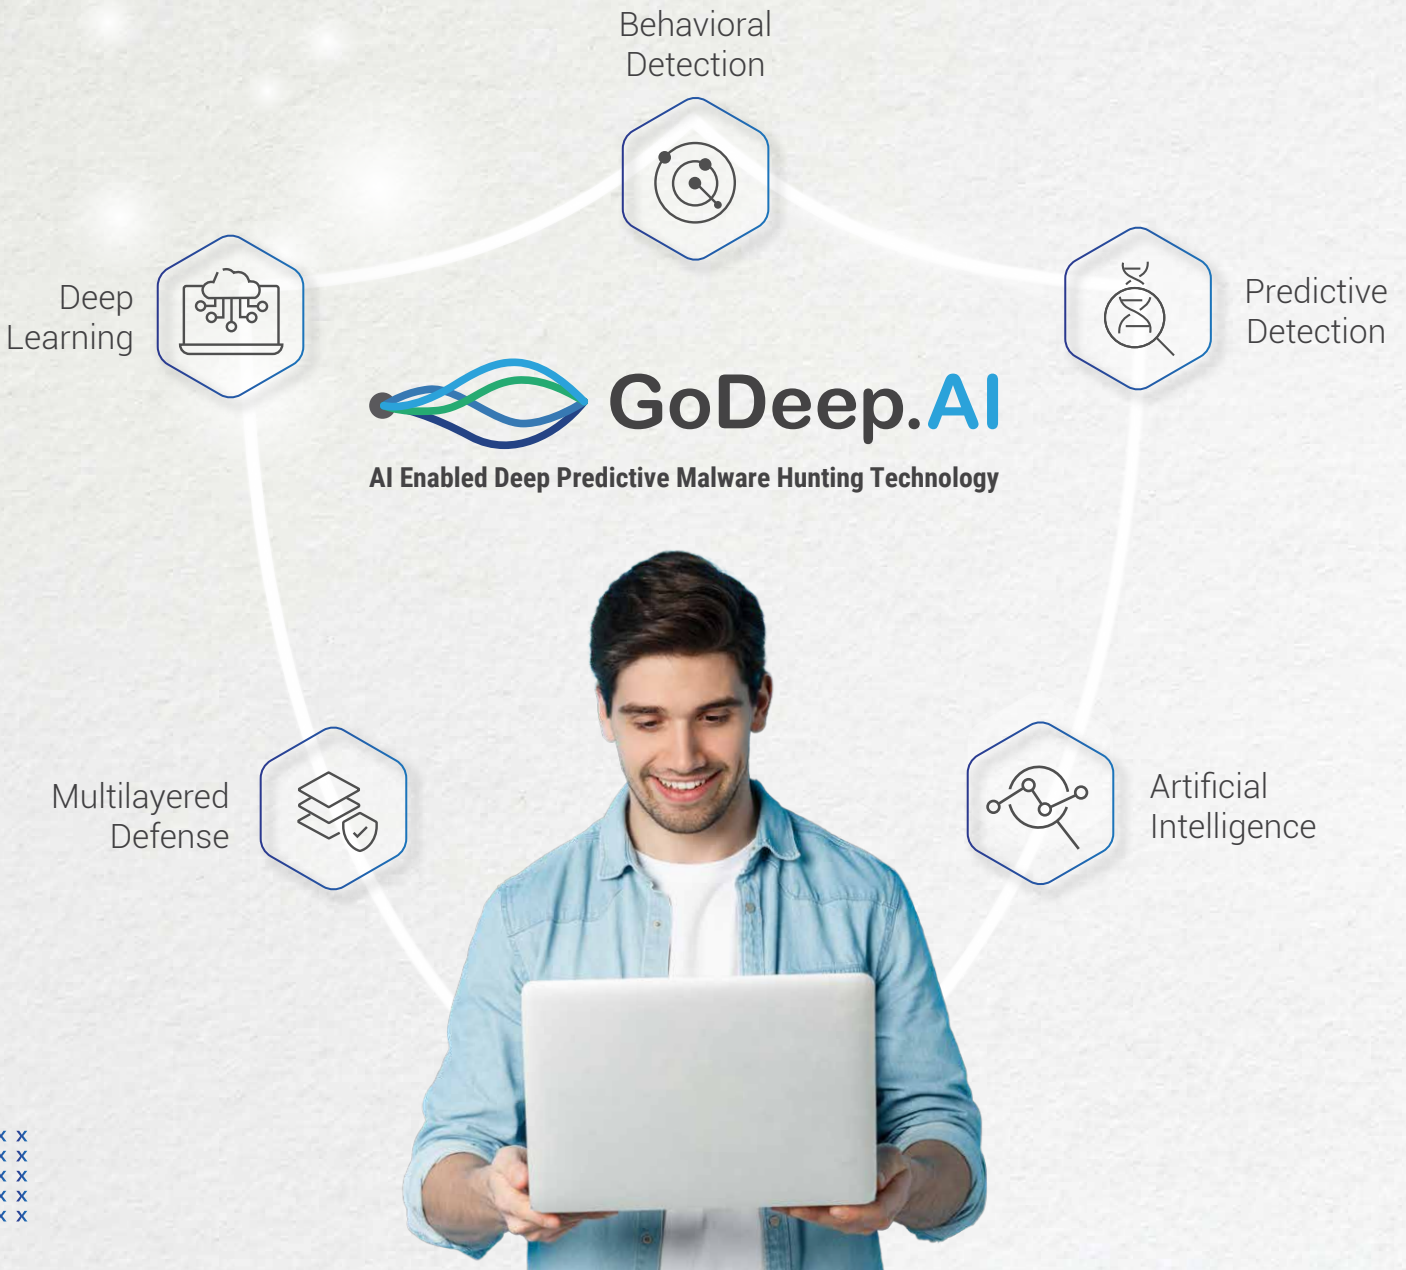

# Quick Heal's Next-Generation Cyber Security Solutions are powered by GoDeep.AI

GoDeep.AI is a cutting-edge malware-hunting technology powered by Artificial Intelligence.

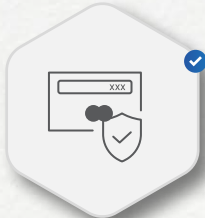

Our **Deep Learning Module** learns and remembers every historical malware threat and stores the learnings in a centralized cloud. It feeds the **Artificial Intelligence algorithm** to learn and evolve in real-time, providing the engine with the capabilities of **Predictive Detection**.

This algorithm works conjointly with **Behavioral Detection technology** that monitors and tracks the activities of each program. This technology further blocks the program immediately if its behavior is found suspicious. GoDeep.AI, with its advanced technology, protects users from threats that have never occurred before **Zero Day attacks**.

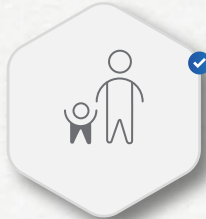

# Enjoy secure **digital experience** with Quick Heal Internet Security

## Key Features

Safe  
Banking

Parental  
Control

Browsing  
Protection

## Product Highlights

### Surf the Internet safely

#### Browsing Protection

- Blocks suspicious and harmful websites that can download malwares and worms to your PC or steal your data.

#### Phishing Protection

- Detects frivolous and phishing attempts instantly that try to steal your data in disguise. You never fall prey to data phishing.

### Pay bills, transfer money online, and do banking without fear

#### Safe Banking

- Protects your credentials including bank account, username, and password during banking transactions and online shopping from getting stolen.

#### Anti-Keylogger

- Blocks all keystrokes spyware that can record your data and send to the hackers.

### Restrict inappropriate websites for your children

#### Parental Control

- Makes Internet a healthy platform for your children. Regulates your children's access to the Internet and blocks websites and apps with inappropriate and offensive content to protect them from online threats. Their safety is in your hands.

### Prevent ransomware attempts

#### Ransomware Protection

- Takes a backup of your data on regular basis, so if there is any ransomware attack, you can remove ransomware and restore your data without getting affected.

### Stay protected with robust scan engine

#### Virus Protection

- Blocks virus infections that try to infect computer programs to gain admin control and steal your data.

#### Malware Protection

- Detects all kinds of malware, viruses, worms, Trojans, and spyware that try to infect your PC from various sources and removes them instantly.

#### Advance DNAScan

- Keeps an eye on all the running programs on your PC to trace any suspicious behavior. DNAScan, our indigenous and proven detection mechanism, detects new and unknown malicious threats based on behavioral classification of the documents and files.

### Secure email communications

#### Email Protection

- Prevents malwares coming through emails.

#### Spam Protection

- Blocks spam emails and malware infected attachments.
